

# AUTOMOTIVE PRODUCTS GUIDE

**CAR WASH** - biodegradable, high foaming, concentrated detergent which removes dirt, dust and road grime, giving a streak-free finish. Standard and Premium Grades available in 5 and 20 litres.

**SUPAWASH** - heavy duty detergent suitable as a dry-on type truckwash which may be sprayed on and hosed off at a later time. Removes dirt, grease and road film. Does *not* contain free caustic. Available in 5 and 20 litres.

**WASH & WAX** - premium grade detergent with inbuilt wax to give a fine shine without the need to polish. Biodegradable. Available in 5 and 20 litres.

**MULTISOLV** - biodegradable, water based degreaser containing **2% caustic soda** suitable for the removal of heavy build-up of grease and oils from engines, workshop floors, driveways and machine parts. **Multisolv** is quick-breaking and may be used where oil separators are required. Available in 5 and 20 litres.

**ULTRASOLV** - **biodegradable, non-caustic** water-based, alkaline cleaner/degreaser suitable for the efficient removal of all types of soils and grease from all parts of a motor vehicle and boats including engines and engine bays, underbody, fibreglass, vinyl seats and trim, upholstery and carpets. May be used through a pressure washer or steam cleaner. **Ultrasolv** is **quick-breaking** and may be used where oil separators are required. Available in 5 and 20 litres.

**WINDOW CLEANER** - is an alcohol based glass and window cleaner which when diluted, removes all film and smears to leave a mirror-clear finish. Useful on chrome and stainless steel also. Dilutes down with 15 parts water to 1 part cleaner. Available in 5 and 20 litres.

**ALUMINIUM CLEANER** - is an acid based cleaner suitable for the removal of oxidation and etched-in road film from "mag" and alloy wheel rims as well as aluminium bullbars, ute trays and pantec truck bodies. Not suitable for the cleaning of alloy engine components. Dilutable. Available in 5 and 20 litres.

**ENGINE DEGREASER** - solvent based emulsifying degreaser suitable for the cleaning of all engine parts. Scrub on and hose off with water. Available in 5 and 20 litres.

**DEGREASING POWDER** - Caustic based heavy duty cleaning powder suitable for cleaning oil stains from driveways and concrete floors. Can be used to make up cleaning solution for steam cleaning machines. In 5, 10 and 20 Kg buckets and 20 Kg bags.

**CARPET SHAMPOO**- Biodegradable, low foaming detergent which may be used in carpet and upholstery hot water extract machines or as a spot cleaner. Contains optical brighteners. Available in 5 and 20 litres.

**VINYL REVIVER-** is a silicon based white emulsion suitable for rejuvenation of all Vinyl, rubber and plastic surfaces. Restores dashboards, vinyl door trims, bumper bars and tyres. Available in 5 and 20 litres.

**INDUSTRIAL HAND CLEANERS-** Available in White and Abrasive White. Excellent for removing grease and oil. Available in 5Kg and 20Kg drums.

**LUBALOID-WD** - is a lubricating and water displacing fluid which can be used to lubricate all metal components including squeaking doors, seized nuts and bolts or it may be used to assist the starting of hard to start cars when sprayed on wet components such as distributors and spark plug leads. In 5 and 20 litres.

**SOLVENTS - METHYLATED SPIRITS - 95%  
WHITE SPIRITS**

**RAGS-** Cotton Tee shirt rags.
